

**EVERNOTE'S "REMEMBER EVERYTHING" GAINS "REMEMBER TO DO EVERYTHING"**

*IQTELL APP BRINGS BEST EVER TASK MANAGEMENT TO EVERNOTE*

100 million Evernote users have just gained a powerful new option for their most loved note taking app – the ability to automatically convert notes to tasks and projects. With the recent major update to IQTELL's web, iOS, and Android apps, users can now have their notes and their productivity, too.

Team IQTELL and its users are big fans of Evernote. We've followed the many discussions on the best ways to harness Evernote for keeping track of tasks and projects to get things done. So, at IQTELL we went to work to incorporate Evernote "to-dos" into our productivity solution, building upon our already solid integration with Evernote.

So now, for the first time, IQTELL offers automatic conversion of Evernote notes to tasks and projects, where all converted entries are managed in the user's IQTELL workspace. While the link to the originating note in Evernote always remains active and a click away. So now Evernote users can have both a powerful note taking app and a productive task management system at the same time – seamlessly integrated in both directions. [Watch video](#).

This auto-conversion of notes, dubbed "EN2IQ", can be best described through a real life example. You are taking notes while in a meeting with your team or with a client. Simply tag any note that requires action with the "Action" tag, or the "Project" tag if it should initiate a new project, etc. Once a note is saved in Evernote, it automatically appears in your IQTELL workspace as an action, a project, etc., based on the tag applied, if any. So, when the meeting is over, you can rest assured that all that needs to be taken care of is inside your IQTELL workspace where you have the full functionality of a mature productivity solution to track progress and complete tasks. (The auto-conversion in IQTELL is triggered in real-time using Evernote's Webhooks.)

Once in IQTELL, Tasks and Projects can be assigned a Due Date, Priority, Context, Time Needed, Recurrence or be Delegated. And, since users can sync their calendars, notes can be easily turned into events on Google, iCloud and Exchange calendars. Email is also seamlessly integrated; so all relevant email communications can be linked to IQTELL entries. Having everything in one place allows an unprecedented level of productivity and peace of mind.

Highlighting the response from our users to the new auto-conversion capability was "Simply outstanding!" Users now realize they have the perfect combination – the speed and ease of Evernote coupled with the full-featured task management of IQTELL. This is the solution they have been seeking for a long time.

IQTELL uses a freemium model. The app is available as a free download on the [App Store](#), [Google Play](#) and the web app at [IQTELL.com](#). The free subscription provides unlimited functionality. After the initial 60 days, the sync of email, calendar and contacts requires a paid subscription. Please see [Pricing](#) for full details.
